

Dear FCC -

Who forces the States to allow media into the hands of the public? The form of censorship I am complaining about is regarding my apartment complex which will NOT allow cable!

According to Nevada State Law, NRS 711.255 - "A landlord shall not interfere with a tenant's reception of cable."

This law is NOT enforced in Nevada! I have tried every way since 1988 to get it enforced - I mean every way... AND I still cannot get cable. When I did get satellite my landlord said it belonged to HIM and is charging me an extra \$15.00/month for the "privilege" of it.

This is blackmail and censorship!

What will the FCC do? WHAT?

I require an answer NOW. I've written you before and no one will help!
